

### About the book

*Introduction of "New Education Policy, 2020" with larger provisions of interdisciplinary and multidisciplinary has brought a new challenge to the conventional subjects of undergraduate and post graduate level of studies. It is a very critical and tough task to guide and advice a student for a right career option in today's world. Choosing a subject for higher level of study from the viewpoint of higher educational opportunities and career prospects is a big challenge for the student community. It needs proper support and guidance before choosing a subject. It is more important particularly in case of conventional subjects. This book highlights the relevance of a subject in relation to higher education, research and career opportunities. It tries to raise students' interest levels to a subject by exploring their skills and to provide a balance solution in regard of higher education and career. One of the key importances of this book is to guiding the career aspirants towards a job of their own choice on the basis of the demand of time and changing situations. This book is an attempt to guide the students for choosing a subject as well as creating a productive, diversified and multidimensional workforce towards nation building process.*
